

FOR REVENUE ASSURANCE

A-to-Be Audit™

 All information included in this document is subject to change as the product evolves

How confident are road operators that all road-side equipment and systems are working as they should? It is common that they have awareness for the possibility of errors occurring, but the inability to independently measure — and prove it — does not allow to take effective measures, enforcing contracts and minimizing revenue leakage.

A-to-Be Audit™ takes on this challenge — to independently measure and offer evidence for systems performance.

Benefits

- Maximize revenue collection.
- Optimize human intervention in enforcement processes.
- Uphold service level agreements contracted with authorities.
- Monitor and enforce KPI for suppliers and subcontractors.

Features

-  Auditing open road tolling and traffic sensors sites for systems compliance and effectiveness
-  Auditing through independent reporting and analytics
-  Software as a Service (SaaS) option available
-  Easy configuration and fast result
