

The activities developed by Brisa Inovação e Tecnologia (BIT) are guided by the continuous search for quality, keeping in mind a better satisfaction level of its clients, shareholders, workers and suppliers, an optimization of the available resources and procedures compliance.

BIT is equally aware that only a responsible resource management makes possible a sustainable economic development, recognizing a proper environment management as one of its top priorities.

With this in mind, BIT considers the following as its guiding principles:

- To guide itself by excellency, conducting its activities in a responsible way, and planning and executing these activities ensuring permanently the service provided to the community in general and to its clients in particular;
- Plan and conduct its activities having as a principle the compliance to applicable regulations and legislation, as well complying with other requirements that BIT subscribes or may subscribe in the future;
- Protect the environment by preventing pollution and minimizing adverse environmental impacts, managing facilities, car fleet, equipment, and developing services and products, taking into account the sustainable use of resources, consumption efficiency and the proper waste management;
- Training and empowering of human resources, so they can carry out their activities having a professional attitude towards the challenges, making them aware of the need to protect and preserve the environment and to respect the rules and guidelines in this area;
- Keep an ongoing search for a better effectiveness of the implemented quality and environment management system, with an active participation of all workers, keeping ethics, innovation and the search for excellence as a basis.

São Domingos de Rana, July the 7th of 2016

Chairman of the Board
