A-to-Be Awarded New Toll Collection System Project Contract in Richmond, Virginia

July 28, 2022 – Chicago

A-to-Be USA announced today that it has been awarded a new contract by Richmond Metropolitan Transportation Authority (RMTA). RMTA operates and maintains the toll expressway system in the Richmond metropolitan area.

RMTA selected A-to-Be to provide a new toll collection system for their Open Road Tolling (ORT) lanes in three toll zones: one on the Downtown Expressway and two on Powhite Parkway. Powhite Parkway is one of the most heavily traveled corridors in the Richmond area, and an estimated 39,000 vehicles use the Downtown Expressway each day.

A-to-Be will provide LinkBeyond, a full toll collection system comprised of LinkBeyond ORT, an open road tolling solution, including the Toll Zone Controller (TZC) subsystem, and a cloud-based, multipurpose Toll Facility Host (TFH). The solution also includes A-to-Be Reporting, A-to-Be DVAS, a digital video audit system, and A-to-Be MOMS, a maintenance online management system. The system is expected to go live by early 2023, and A-to-Be will provide maintenance support for up to 10 years following system acceptance.

“We are excited to partner with A-to-Be to provide our customers with a new, industry-leading toll collection system,” said Joi Dean, CEO of the Richmond Metropolitan

Transportation Authority. “The new LinkBeyond system will help ensure our drivers continue to have the safe, efficient and convenient experience they have come to expect from RMTA, for years to come.”

“A-to-Be is pleased to continue serving the Richmond community and to partner with RMTA to bring our widely deployed Electronic Toll Collection system that benefits Virginia drivers,” said Doug Chastain, Chief Sales Officer, North America at A-to-Be. “A-to-Be’s LinkBeyond products are tested and proven on more than 1,300 lanes of roadway in the U.S. and Europe, including in the greater Richmond area, and we are pleased to bring our more than 40 years of expertise to RMTA.”

About A-to-Be

A-to-Be is a technology provider that develops and deploys advanced tolling and mobility solutions across the globe. Part of Brisa Group, A-to-Be has solutions operating in multiple states, countries and continents. For over 40 years, A-to-Be has provided leading end-to-end tolling solutions, including RUC. Today, we are enablers of integrated mobility experiences. With billions of annual transactions, we build innovative solutions, with exciting research lines. Our technologies drive mobility forward.
